MARYLAND CENTER for SCHOOL SAFETY

THE DANGERS OF DEVICES

A presentation that highlights the dangers involved with the use of technology and the devices we, and more importantly, our youth, use to access that technology each day.

Audience

This presentation is ideal for anyone that works with youth in schools or in the community:

- School System Personnel
  - Teachers
  - Staff
  - School Administrators
  - SROs
  - School Security Employees
- Parents
- Community Groups

Training Format

A two-hour course that can be can be adapted to fit varying schedules. Ideally an in-person course but virtual is an option. It includes a mix of lectures and interactive content.

OBJECTIVES

This presentation will familiarize the audience with:

- Identifying dangers of adolescents using internet devices.
- Identifying pitfalls of social media.
- Recognizing the effects technology has on the Physical and Mental Health of adolescents.

The session will discuss the effects of

- Screen Time
- Cyberbullying
- Violence
- Social Isolation
- Instant Gratification
- and other factors that can negatively influence our students.

It also features an open and honest, interactive discussion as to how these dangers affect adults as well.
